

1 HEALTH SAFETY & ENVIRONMENT POLICY

Health, Safety & Environment Policy

Coal Augering Services (CAS) is a specialised Coal Mining Contractor. We are committed to achieving compliance with current legislation to facilitate income generation and the provision of a quality product whilst maintaining a safe production environment.

At all times our behaviour will be safe, ethical, proactive and responsible.

CAS is committed to achieving continual improvement and supporting the principles of sustainable development. This commitment is reflected in the application, and ongoing development of systems for the management and continual improvement of health, safety, environment and training for CAS personnel, its clients and the local community.

These systems ensure that we:

1. Comply with, and where appropriate, exceed applicable legislative requirements.
2. Identify, evaluate and manage all risks that flow from the work we do.
3. Implement industry codes of practice and other relevant requirements.
4. Create a workplace culture that values the elimination of work related injury and illness.
5. Engage and consider the views of our stakeholders.
6. Adequately develop and provide resources to meet our objectives and targets.
7. Use all resources responsibly and efficiently.
8. Minimise waste and prevent pollution.
9. We will establish measurable objectives and targets to meet these intentions and shall regularly review our progress, ensuring that this policy remains relevant to our business and stakeholders.

Bret Leisemann, Managing Director, 11 July 2017.
